HS: Headset Profile.

HF: Handsfree. The handsfree profile is a much richer profile for the car kit application, supporting more features.

SAP : Sim Access Profile only for the CK3500 car kit

**Note 1** : Some phone software versions allow to configure the phone in the headset profile only.

**Note 2** : The whole phonebook is automatically transferred to the CK3100.

**Note 3** : This feature is not useful because the phone does not support dialing from the car kit.

**Note 4** : You can synchronize your phonebook by using a third party software : Nokia\_810\_contacts\_sync\_3\_10.

The synchronization is not automatic : you have to launch this soft each time you want to actualize the phonebook of the car kit,

You can download this soft at : [www.nokia.com](http://www.nokia.com)

**Note 5** : Before sending contacts over Bluetooth to the carkit, activate the Special Menu (refer to: Settings > Advanced Settings > Object Push, and select D500, MyX-8).

Then from the phone, select the contacts you want to send over Bluetooth.

**Note 6** : If you encounter problems with pairing a Sagem phone, refer to: Settings > Advanced Settings > Pair with phone > Sagem phones

**Note 7** : Hang up from the car kit not possible if a pop-up is displayed by the phone

\* : These phones need a special pairing mode (see "Advanced Settings" and "Pair with phone..." in the CK3100 Menu). For SE K750/W800... if the phone crashes, use the menu SE K750/K600 with No Sync

\*\* : These phones are not able to send contacts over Bluetooth, but it is possible to use a third Bluetooth device to send contacts to the carkit's memory.

And then, you can dial from the carkit using the phonebook pushed from the other device.

The phones with note 2 allow to download the "call history" of the phone to the car kit.

For the non-compatible phones, the "call history" is available in the car kit with the calls dialed from the car kit.
